1 NO POVERTY
IDPs tend to be the poorest people in their countries, and poverty increases the likelihood of renewed displacement.

2 ZERO HUNGER
Internal displacement often creates food insecurity, which is the most pressing challenge facing many IDPs.

3 GOOD HEALTH AND WELL-BEING
IDPs tend to have greater physical and mental health needs and can have more difficulty accessing health services.

4 QUALITY EDUCATION
IDPs have inadequate access to education due to discrimination and lack of resources, teachers, and documentation.

5 GENDER EQUALITY
Women and girl IDPs are at greater risk of sexual and gender-based violence. Men and boys may be forcibly recruited or suspected of being combatants.

6 CLEAN WATER AND SANITATION
IDPs often have less access to clean water and sanitation, particularly when humanitarian actors leave and emergency systems degrade.

7 AFFORDABLE AND CLEAN ENERGY

8 DECENT WORK AND ECONOMIC GROWTH
IDPs often have limited or no employment opportunities.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

10 REDUCED INEQUALITIES
In-country inequality can lead to displacement. IDPs face persistent inequality that hampers their ability to fully integrate.

11 SUSTAINABLE CITIES AND COMMUNITIES
IDPs increasingly live in urban areas, putting a strain on resources and potentially leading to secondary displacement.

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

13 CLIMATE ACTION
Many people are displaced due to climate change.

14 LIFE BELOW WATER

15 LIFE ON LAND

16 PEACE, JUSTICE AND STRONG INSTITUTIONS
Conflict is an immediate cause of displacement.

17 PARTNERSHIPS FOR THE GOALS
A comprehensive response to the short and long term needs of IDPs requires multi-stakeholder partnerships.

SUSTAINABLE DEVELOPMENT GOALS

Affordable and Clean Energy
-The 7th Goals of United Nation's SDGs for 2015-2030 (Sustainable Development Goals)

Solar energy is inexhaustible, low-cost, simpler installation, and closer to people's life.

Why Solar?

What we can do?

Advanced Technology Driven

Professional Tech Solutions for Multi-Senarios

Global Service Network

One-stop Supply Chain Integration

With strong industry resources and integration ability, we have established R&D center bases and studios in Xi 'an, Shenzhen, Istanbul(Turkey). Standardized production plant in Xi 'an, Shenzhen, Ningbo, Nantong and etc. With 17 core patents, 30 technicians(including 2 doctors and 17 masters), we are capable of providing professional solar solution for multi-senarios.

At present, our solutions and products are widely applied and used around the world.
